

FIR_0024 — First Information Report

On 2025-06-26, the complainant approached Station 19 and reported a suspected financial irregularity. The complainant stated that the incident was noticed during routine activity and that the precise time of the underlying event was not initially known. During preliminary enquiry, officers recorded the names of persons who had access to the relevant premises, vehicle, account or document. The name Subhash Kumar was mentioned in connection with the enquiry, although the available information at the time did not independently establish the person's involvement. The officer recorded the address and contact information supplied by the complainant and noted that further verification was required. Subsequent enquiries included examination of available records, statements and physical or digital evidence. Some records referred to the subject using abbreviated or differently formatted names. The investigation diary therefore treated the identity as provisional until supporting identifiers could be compared. The matter was registered for investigation, and the evidence register was opened for documents and materials received after the complaint. No conclusion regarding culpability was recorded in this initial report.

The investigating team also noted that ordinary commercial and personal activity existed around the persons and locations mentioned in the complaint. This information was retained because it could provide either corroboration or an innocent explanation for an apparent connection. The report records only facts available at the stage of registration and does not treat later investigative findings as established facts.

The investigating team also noted that ordinary commercial and personal activity existed around the persons and locations mentioned in the complaint. This information was retained because it could provide either corroboration or an innocent explanation for an apparent connection. The report records only facts available at the stage of registration and does not treat later investigative findings as established facts.
