

Forensic Analysis Report — CR-2017

FORENSIC SCIENCE LABORATORY REPORT — SYNTHETIC

Report ID: E-0176 | Case: CR-2017/2026

Examined by: Senior Scientific Officer, FSL Kalina | Received: 2025-05-11

Offence classification: CYBER_THEFT

Exhibits examined (seals intact on receipt):

Exhibit A — trace/contact evidence from scene

Exhibit B — discarded articles collected from scene

Exhibit C — mobile handset / storage media (where applicable)

Methods: visual examination, fingerprint development (where applicable), physical matching, digital extraction and toxicological/material analysis as appropriate to the exhibits.

Findings: trace evidence is consistent with the sequence described in the FIR for atm skimmer placement across three suburbs. No exculpatory inconsistencies were noted.

Comparisons with reference samples from named subjects and with the scene report were conducted; conclusions are reported under covering memo to the IO.

Limitations: results are interpretive and should be weighed with CDR, ANPR, financial and witness evidence rather than read in isolation.

Synthetic report — not a real forensic examination.

- Vikram Khan (role: ACCOMPLICE)
- Suresh Shaikh (role: WITNESS)
- Kavita Ansari (role: VICTIM)
- Manoj Hussain (role: ASSOCIATE)
