

## Investigation Progress Report - Synthetic

Case CASE\_0040 concerns a synthetic procurement fraud matter opened on 2022-02-18. The initial record names Kiran Goud as a person requiring enquiry. The early stage relied on witness information and routine records; the identity was not treated as conclusively established from name alone. A subscriber record associated with PHONE\_00292 and account ACCT\_00309 provided additional context. Vehicle VEH\_0048 was reviewed because it was observed during the relevant period. As the enquiry progressed after 2022-03-20, investigators compared telecom, financial and location records. The working hypothesis is deliberately stated as provisional: ordinary employment, family contact and legitimate commercial activity may explain some of the observed links. The case file should therefore distinguish corroborated observations from inference and should not treat network association as proof of culpability.

Progress entry 9: analysts recorded the current evidence state and the unresolved alternative explanations. Next action: verify the strongest independent source before expanding the working theory.
