

Investigation Progress Report - Synthetic

Case CASE_0048 concerns a synthetic account mule investigation matter opened on 2023-04-19. The initial record names Saravanan Prasad as a person requiring enquiry. The early stage relied on witness information and routine records; the identity was not treated as conclusively established from name alone. A subscriber record associated with PHONE_00525 and account ACCT_00195 provided additional context. Vehicle VEH_0014 was reviewed because it was observed during the relevant period. As the enquiry progressed after 2023-05-13, investigators compared telecom, financial and location records. The working hypothesis is deliberately stated as provisional: ordinary employment, family contact and legitimate commercial activity may explain some of the observed links. The case file should therefore distinguish corroborated observations from inference and should not treat network association as proof of culpability.

Progress entry 37: analysts recorded the current evidence state and the unresolved alternative explanations. Next action: verify the strongest independent source before expanding the working theory.
