

Investigation Progress Report - Synthetic

Case CASE_0059 concerns a synthetic loan fraud matter opened on 2024-02-21. The initial record names Ganesh Kumar as a person requiring enquiry. The early stage relied on witness information and routine records; the identity was not treated as conclusively established from name alone. A subscriber record associated with PHONE_00529 and account ACCT_00102 provided additional context. Vehicle VEH_0001 was reviewed because it was observed during the relevant period. As the enquiry progressed after 2024-03-18, investigators compared telecom, financial and location records. The working hypothesis is deliberately stated as provisional: ordinary employment, family contact and legitimate commercial activity may explain some of the observed links. The case file should therefore distinguish corroborated observations from inference and should not treat network association as proof of culpability.

Progress entry 38: analysts recorded the current evidence state and the unresolved alternative explanations. Next action: verify the strongest independent source before expanding the working theory.
